

SPS pump well SPS-455-D-RX3

”High-quality pumpwell with long service life”

Pumpbrunn SPS-455-D-RX3 is a powerful 2 m pump well equipped with a brass check valve, designed for pumping drainage water, stormwater, or greywater after a treatment plant.

Our pump wells are manufactured with high quality and long service life. The pump and discharge pipe are made of stainless steel and feature a convenient quick coupling for easy lifting in and out of the pit. Installation is simple thanks to the flat bottom and self-anchoring pump housing.

A wireless alarm is available as an optional accessory. If a more reliable control system is desired instead of the vertical float switch, the SPS pump control system is available as an option. When installed, it provides both audible and visual alarm signals.

The pump well is available in three heights: 1500 mm, 2000 mm, and 3000 mm.

Specifications

- **Model:** SPS-455-D-RX3
- **Height:** 2000 mm
- **Diameter:** 455 mm
- **Level control:** Vertical float switch
- **Pump:** Pedrollo RX3
- **Max lifting height:** 9 m
- **Max flow:** 240 L/min
- **Single phase 220 V:** 3.5 A
- **Inlet:** Ø 110 mm
- **Outlet:** Ø 32 mm
- **Alarm:** No
- **Check valve:** Yes
